**TIF400 series** offers excellent thermal performance and high compression set while remaining cost effective. This material conforms to surface irregularities under low application pressures to fill air gaps between components and the heat source.

**TIF400 series** combines good thermal conductivity of 2.0W/mK with high compressibility to produce low thermal resistance. TIF400 series is electrically non-conductivity, stable from -50°C to 200°C. The material is naturally tacky. Additional adhesive coating is not required.
